

ENDWELL FIRE DISTRICT

PHYSICAL ABILITY POLICY

Number: 2023 - 29

Adopted: March 22, 2023

Participation in the Endwell Fire District as a responding member is a privilege. Only those persons who are physically and mentally fit within the meaning of this policy shall be qualified and permitted to perform in such role. No person is entitled to perform any role, regardless of their qualifications. The District's medical provider is the ultimate authority regarding whether or not a member meets the required physical abilities for the role performed by the member.

1. All candidates for active membership (other than as a Rehab Member) shall successfully complete a physical exam provided by the District's medical provider prior to the District's final approval of their membership. Approval of membership may be contingent upon the successful completion of a physical for the position applied. Should a candidate obtain a physical exam prior to acceptance by the District, such candidate's results shall not be provided to the District for consideration until after a decision on membership has been made by the District. All new active members shall be offered the Hepatitis B Vaccine or Hepatitis B Titers and a test for TB.
2. Every individual in the department must successfully complete a physical, for their position, every year. Physicals will be administered by the District's medical provider between January 1 and March 31 of each year. If a member has not had or successfully completed an exam by the end of March, they shall be removed from active duty and shall not respond to emergencies, participate in drills or training or represent the District at any event until such an exam is successfully completed. The Board of Fire Commissioners will compile a list of all members who have not completed their physicals during the prior calendar year. At the board meeting in April, the Board of Fire Commissioners will remove the privileges of the non-compliant members performing active duties. The District Board of Fire Commissioners will inform the Fire Chief and send letters to all non-compliant members and send a copy of the list to the Fire Company President.
3. Members shall only be qualified to perform in the positions for which they are physically and mentally qualified, and if there are no such positions, then they shall be removed from active duty until they are so qualified.
4. A member shall be subject to discipline for performing in any role if they have been removed from such position.
5. Any member which is aware that they cannot meet the physical and mental fitness requirements for a prolonged period shall report the same to the Fire Chief and shall not respond to emergencies or participate in any active event.
6. When a member is given medical restrictions or returns to active membership status, it is the District's responsibility to inform the Chief and firematic officers of the changes in the person's membership status.
7. Any member returning to active duty, or returning or moving to a more strenuous and physically demanding position must complete a physical. The member will, before visiting the District physician, inform the Fire Chief of their request. The District will direct the member to schedule an appointment. The District will inform the Chief as soon as possible. The member is to inform the Chief of his/her understanding of their request. If the Chief needs additional information he/she will contact the vendor.

ENDWELL FIRE DISTRICT

PHYSICAL ABILITY POLICY

Number: 2023 - 29

Adopted: March 22, 2023

8. Any active member who has an obvious physical injury or disability which prohibits them from performing any active role shall be placed on medical leave. The Chief shall be notified by the member or a member's representative of such condition and the Chief shall notify the Board of Commissioners.
9. A Fire District Commissioner will be a contact point for the vendor service organization to assure assistance is provided when required. The vendor service organization will provide a contact person for the Fire District.
10. If a member declines a service from the vendor organization they will be asked to sign a vendor-supplied form indicating their decision.
11. The vendor organization will provide monthly billing for services provided.
12. All active members shall successfully complete a physical provided by the District each year regardless of age or operational assignment. Failure to do so shall result in the removal of active status until such a requirement is met.
13. The District will provide all members with the paperwork to schedule an exam appointment with the District's exam group. The paperwork given to the member will include an authorization form to get a physical. The signed acknowledgment will be given to the District secretary by the Chief. The Chief will ensure the application form clearly states what position the member is being tested for after discussing with the member and reflecting on the member's choice of position. The Chief may ask an assistant chief to perform this task. If a member is to assume the duties of a different position they first must meet the physical exam requirements of the new position.
14. The District will arrange for the physician and medical assistants to perform the exam and review the results with the active member. If the member wishes the physician to provide the exam results to their personal physician, the member will be required to complete a written form requesting this disclosure. The physician will maintain all confidential records and the Board of Commissioners will only be provided a summary indicating that the member has passed, failed, or, passed with restrictions. The Chief will be informed within five (5) days after receipt of the results of each physical, by phone message and email. The Chief will confirm with the member who has restrictions that he/she understands the limitations placed on him/her as a result of the exam findings. The Chief will inform all firematic officers that the member has either been placed in inactive status or the member has restrictions. If a member is asked to perform duties that are not allowed per restrictions, the member must inform the person giving the direction and must NOT comply with directions that compromise any restrictions. The Chief will confer with the staff conducting the physical exams if clarification is required, and may request information on the member's abilities and limitations, but will not request any information on the individual's physical health. This summary will be kept in the member's secured personnel folder.
15. The categories of Active Membership for which physical requirements shall be issued are:
 - Interior Firefighter
 - Exterior Firefighter / Scene Support

ENDWELL FIRE DISTRICT

PHYSICAL ABILITY POLICY

Number: 2023 - 29

Adopted: March 22, 2023

– Fire Police

16. The District shall maintain a list of physically demanding tasks for each firefighting category. A person must be physically and mentally qualified to perform all of the tasks for any category for which he desires to perform on an emergency scene.
17. All physical exams shall be performed by the district's medical provider or company chosen by the District. The District shall pay for all initial physical exams. The treatment or further examination of any discovered condition, illness, or medical problem shall be the responsibility of the member and not the District unless such is covered by VFBL.
18. If the district's medical provider is unable to determine whether or not a member meets the physical fitness standards without the assistance of a specialist, the District will not pay for the necessary exams of the specialist and the applicant or member shall provide the specialist's report to the District's physician for review.
19. No second opinions will be paid for by the District. Challenging opinions are also not permitted and will not be considered.
20. Only those persons who are deemed physically capable of performing those duties which may be assigned to them during emergencies shall be qualified to do such duties.
21. Persons with known heart disease or heart conditions, epilepsy, or emphysema, may not participate in interior emergency activities unless the district's medical provider certifies that the individual's fitness allows him to participate in such activities.
22. Persons may only perform those operational assignments for which they are physically and mentally qualified.
23. In order to serve in any of the following capacities, a person must be physically and mentally competent to perform the following tasks without jeopardizing his health or safety, or another's health or safety, due to health-related conditions or physical or mental disabilities. The District's medical provider is the ultimate authority regarding whether or not a member meets the required physical abilities for the role performed by the member. If the District's medical provider determines that a member is not capable of performing any particular required task for a particular assignment, the member may be reassigned to a different operational assignment at the discretion of the Fire Chief.

The district's medical provider or other qualified health individuals shall assure that an individual can satisfy the following requirements, subject to review and confirmation by the District's medical provider:

Interior firefighters

- a. Wear 60 pounds of gear for up to two (2) hours.
- b. Climb a 24' ladder wearing such gear, carrying 15 pounds of equipment.
- c. Crawl for 30 minutes while wearing such gear.
